

ELECTRICAL SAFETY TIPS

FOR KIDS

Electricity is helpful. It provides energy that we use to light our homes and operate lots of other things. But electricity can also be dangerous. Lots of people are hurt and killed each year in electrical accidents. We could avoid the accidents by following these simple safety tips ...

NEVER stick finger, toys or other objects into an electrical outlet. You might get hurt by electricity.

NEVER place a hair-dryer, radio or other electronics near the bathtub or shower. Electricity and water are dangerous partners!

NEVER pull a plug from an outlet by its cord. Electricity could jump from the cord and give you a nasty zap.

NEVER place your drinks on top of your video games or other electronics. They could easily spill, and get you zapped by electricity.

NEVER climb trees near power lines. You might touch one by mistake and get zapped.

STAY AWAY from places marked with warning signs. These places are very dangerous, even for adults!

Anytime you need to use something that needs electricity, **ask an adult for help!** Remember, you can never be too safe.
